NOT THE QUESTION.

In the great scandal at Brooklyn a very queer and unwarrantable proceedure is being introduced by the friends of Beecher, and that is the blackening of the character of Tilton. Now we do not propose to speak in Tilton's favor, but we do think that this is an evasion of the point at issue. It makes no difference to this case whether Tilton is an an angel of light or a fiend incarnate. The question is, Is Beecher ignocent or guilty? and not a question of Tilton's morality. By blackening Tilton's character Beecher nor his friends need expect to whiten his, but it rather leads all reflective minds to think that this dodge is a mere subterfuce of Beecher's in order to attract public attention to his great rival, in hopes that thereby he may shrink back into a secondary position in the great nastiness. That dodge will not work. The plain question, Mr. Beecher, is. are you innocent or guilty? Nothing *hort of an answer to this query will suffice.

The Winnemucca Railroad.

A correspondent at Bartlett Creek. Northwestern Nevada and South- prisoners are reported to have as eastern Oregon, writes as follows

and seventy miles west from Vary-ville, and Goose Lake Valley is twenty-four miles north from Lake The most available route for a railroad from Winnemucea to Goose open an extensive mineral, agriculand would undoubtedly do the heaviest lumbering business of any railroid line in the world. The Sierras nor line in the world. The Sierras nor line in the world a dense growth of the finest time br in the United States, which would upon the completion of the tural and heavily timbered country, would upon the completion of the road supply the greater part of Nevada and all of Utah with lumber. The timber of itself ought to be a sufficient inducement to capital to inrest in the enterprise and complete the road at an early day. That a road will be built sooner or later to make this timber available there is Beaver Meadow, gathering new remodenbt, and the time is not far cruits. The streets are thronged distant when it will be a necessity. The timber supply of the Central Pa-cific road will shortly become exhausted and Central and Eastern Nevaluand Utah will have to be suppied from the virgin forests northwest of Humboldt, which have never resonnded with the woodman's ax. and which in extent are unequalled dren were burned to death, and are practically inexhaustible

Reno is the natural location for any proposed road running north. connecting that section with the transcontinental line. We hope her claims will be fully considered, before active operations are commenced at any other point.
